

PROFILE

When it comes to work, I am a highly dedicated person. I put in much effort to complete projects before the deadline. I am extremely enthusiastic about what I do.

I have a strong desire to suggest solutions that will benefit society. A typical example is the introduction of an E-levy calculator. I created an E-levy calculator to help users know how much they would be charged per their transactions. It also includes a breakdown of what telcos charges.

I have currently built an eportfolio website to automatically generate websites for job seekers and undergraduates [[LixLio](#)].
